

2. Management techniques and storage methods

1. Leather is an oil based product. Therefore it is crucial that it is not exposed to organic solvents such as acetone, ballpoint pen ink, gasoline, thinners, sweat, mousse, spray, and etc.

2. Where there is direct contact with the head or skin, wipe with a dry cloth.

3. If there is contact with cosmetic products or volatile emulsions and is left for a long time, the surface may peel off so wipe with a dry cloth as soon as possible.

4. When washing the outer cloth, use a neutral detergent and wash alone by hand.

5. If there is contact with hot objects or heat, the leather will curl up so please use caution.

6. Avoid direct sunlight or humid places.
(They can expose the product to bleaching or aging.)

7. Store at room temperature.
